SUMMARY

- Hands-on experience in **PHP development (4 months)**, adding versatility across tech stacks.
- **Self-learned Flutter and MERN Stack** by building multiple hands-on projects, demonstrating strong initiative and practical development skills.
- **Published the Game Radar app** on the Google Play Store, showcasing self-driven development using Flutter and Firebase.
- **Currently creating a MERN-based website called GameHive**, featuring a community section for discussions and a freebies section to showcase and share free games, apps, and deals.

EDUCATION

- MCA (Full-Stack) From Jain University Bengaluru - Ongoing (Online)
- BCA From BVMHCC Cherpunkal (MG University) - 60 %
- Higher Secondary Education From SHPUC Madanthyar. - 75%
- SSLC From St. Sebastian's HSS Kadanad - 89 %

SKILLS

Languages	Python, PHP , Dart, Javascript
Frameworks & Libraries	ReactJS , Flutter
Databases	MySQL , MongoDB
Backend & BaaS	Node , Express , Firebase
IDE	Visual Studio
Version Controls	GIT

EXPERIENCE

Software Developer - SPR Digital Lab

Kochi - From May 2024 – September 2024

MAJOR PROJECTS

#1 .Quick Chat • [CODE](#)

QuickChat is a MERN-based real-time chat application that enables seamless one-on-one and group messaging. It features secure user authentication, live message updates via Socket.IO, and a responsive interface for smooth communication across devices. The app integrates MongoDB for scalable data storage and supports media sharing for an enhanced chat experience.

Tech Stack: React, Node.js, Express, Cloudinary, Socket.io, Git

#2 .DevQuery • [DEMO](#) • [CODE](#)

DevQuery – A full-stack web app that enables developers to ask and answer coding questions in a gamified environment. Features include a point and badge reward system, public profiles, tag-based search (JavaScript, React, Firebase), and **QueryAI**, an integrated AI assistant for real-time coding support.

Tech Stack: React, Node.js, Express, Firebase, CSS, DeepSeek API, Git, GitHub

#3 .Game Radar (APP) • [DEMO](#)

Game Radar is a Flutter-based app that helps users discover and claim free games, DLCs, and app deals. It uses a GitHub-hosted JSON backend and integrates Firebase for push notifications, analytics, and hosting. The app has over 8,000 downloads on Google Play with a 5-star rating.

Tech Stack: Flutter, GitHub, Firebase (FCM, Hosting, Analytics), Android Studio, Git, Google Play Console

OTHER PROJECTS

portfolio Website	React, Firebase	• Dynamic content management (Firestore) • Admin panel with live content editing	CODE
Game Radar Web	React, CheapShark API	• GR and CheapShark API integration	CODE
ReelPeek	React, TMDB API	• View movie trailers and descriptions	CODE
Pharmacy Management System	Python, Django ,Git	• 5 user types with dashboards • Admin panel with live content editing.	CODE
Store Management System	PHP, MySQL, JavaScript, Bootstrap	• Inventory, billing, & customer management • Product CRUD, stock & sales tracking
